

ZO Motors Receives First ZM8 Battery Electric Trucks From Weichai For Cambodia

Following the strategic partnership agreement with Weichai Commercial Vehicle New Energy Co. Ltd., the first result is the delivery of twenty (20) ZM8 battery electric trucks to ZO Motors for Cambodia.

These vehicles, produced by Weichai to ZO Motors specifications, will be introduced to Cambodia with impressive specifications like 10,500 lbs. payload on a Gross Vehicle Weight (GVW) of 16,500 lbs. The 600-volt architecture and ample 96 kWh battery capacity will cover most use-case scenarios in densely populated urban areas.

With standard 125 kW DCDC fast charging, the ZM8 can be charged in 40 minutes from 20% to 80% state of charge (SOC).

Final body upfit will occur in Cambodia with local partners.

For the North American market, the ZM8 will be displayed during the ACT expo in Las Vegas May 20 – 23, 2024. We encourage you to visit us in Booth #444 and experience the ZM4, ZM8 and ZM18 for yourself.
